RE: LICENCE AGREEMENT FOR USE OF FALL FACTOR ZERO LTD ROPE ACCESS PROCEDURES

I can confirm that Center of Professional Education – “ALANDR” has purchased a licence from me entitling them to use my rope access Training Procedures, Training Manual and supporting forms.

All paperwork is licensed to be used by Center of Professional Education – “ALANDR”, this licence does not entitle the company to sell it on to another company, nor for current employees of the company to carry it with them to any future company that they may work with.

It is the responsibility of the company to read, understand and implement the contents of the procedures. Including integrating the documents into any existing procedural and quality management systems currently in place.

In order to achieve this it is advisable for the rope access management team to run through this material, performing a self-audit. This will help in the understanding of the IRATA system and to familiarise the rope access management team with the content of the new documents.

Regards,

Alan Forrest  
Director
